

HOW TO USE THE HEALTHCARE TRANSLATION WEB APP

Select Languages

- Choose the input (spoken) language and output (translated) language.
- Use the  Swap button to switch them.
- Click  Start Recording to begin voice input.
- Speak clearly, and the transcribed text will appear in the "  Transcribed Text" section.
- Click  Clear to reset the text.

Translation

- The transcribed text is automatically translated from the input language to the output language.
- The translated text appears in the "  Translated Text" section.
- If the speech is not medical related, the translation will be a message informing you that the speech is not medical related.

Text-to-Speech (Playback)

- Click  Playback to hear the translated text.

Error Handling

- If the translation fails, an error message is displayed.
- After a few seconds, the translation continues
- Real-time transcription restarts automatically if interrupted.
